

Grade levels: 1st and 2nd

Standards:

1.1.18- Find equal money amounts with different coin combinations up to \$0.25.

2.1.20- Find different coin combinations that represent equal money amounts up to \$1.00.

Idea sent in by: Missy Kirchner- Cleveland- 1st grade
Missy Smith- Central- 2nd grade

Materials needed: copy of train pattern, plastic money from math kit, glue, markers, student worksheet

Directions to make a sample:

- Cut out and assembly the train.
- Write a money value on the engine.

Activity Description:

Pass out trains and money to students. Students look at the value and place coins equaling that value in the first train car. In the second train car, students place different coins that equal the value on the engine. When students finish the activity, they should complete the *All Aboard The Math Train* paper.

Please Note:

There are two versions of the All Aboard The Math Train paper. One copy is specifically for 25¢, while the other can be used with any money value.
