

**MOSSER ELEMENTARY STUDENTS AND PARENTS
TO SCORE BIG AT MATH WORKSHOP -PART III**

DATE: Wednesday, December 7, 2005

TIME: 4:30 – 6:30 p.m.

LOCATION: Mosser Elementary School
129 S. Dauphin St., Allentown
484-765-5880

BRIEFLY: Mosser Elementary students and families will learn the methods of fun behind math at a free workshop presented by Mosser teachers. More than 180 parents, students, and teachers have attended in the past. The event will use computers, technology and math games to help parents and children practice basic skills while parents become familiar with the school's math curriculum. Free pizza, soda and door prizes are available. This is the third Math Workshop that Kim Walck, math department teacher, has hosted and the turnout for these events is impressive! This math workshop is improved with computers, technology, and new Math Investigation modules being integrated into the program for parents and students to enjoy. The gaming area too has changed with a board game marathon where many games are lined up for families to play.

“Our community’s response to this night is overwhelming; parents attend the workshop to better educate themselves and their children, becoming partners with their child’s teacher and school,” said Kim Walck, M.Ed., ASD Title I teacher. “This is going to be a powerful evening where teachers and parents come together to strengthen students’ skills by playing math games and surfing the Internet.”
