

*****MEDIA INVITATION*****

**Harrison Morton Middle School Celebrates
Science, Technology, Engineering and Math [STEM]**

DATE: Thursday, May 21, 2009

TIME: 6:00 p.m. – 8:00 p.m.

LOCATION: Harrison-Morton Middle School
137 North 2nd Street

BRIEFLY: The future is theirs who have a firm grip on science for our world. Harrison-Morton Middle School and Lehigh University invites the public, media, families and community leaders to join them for science and pizza on Thursday night. HMMS Science Night is the culminating event every year, celebrating the ongoing Harrison-Morton/Lehigh University STEM partnership – STEM standing for Science, Technology, Engineering and Math.

One way Lehigh University supports the partnership is by assigning graduate students to Harrison Morton classrooms. The graduate students make school visits throughout the year to peek student interest in the STEM fields and by sharing with HMMS students real life careers that relate to these topics.

Science Night will give Harrison-Morton students in grades 6-8 the chance to do science experiments and demonstrations and present some of their course work projects from the past school year. The science and technology projects will be on display for the two-hour science night. Prizes will be awarded to students at the conclusion of the presentations. Air Products and Chemicals, Inc. will also be on hand to do a dry ice demonstration towards the end of the evening.
